

## Weapon Storage

# FWS europe

**FWS Europe has unparalleled experience in design and supply of weapon storage equipment to governments, military, police forces and international agencies – all around the World. The knowledge and skills we have gained from our very many diverse assignments mean that we are uniquely placed to deliver outstanding expertise, products and service for your project.**

Approved to ISO9001, all processes take place under the same roof, from design and engineering to production, painting and packaging.

## **Ultimate Flexibility**

Our weapon storage equipment enables storage of any combination of small arms and accessories to precisely suit your operational requirements.

## **Space Efficient**

No other system is able to offer such high density storage of weapons or enables such efficient storage for combinations of different weapon types. Our mobile racking systems dramatically increase capacity further still – by nearly 100%.

## **Products for all locations**

The system provides solutions for weapon storage in diverse locations including on land, on board ships, in road/tracked vehicles and aircraft. We provide options from open racking in secure areas through to rated safes for exposed locations.

## **Space Planning**

Our 3D CAD software enables precise space planning for your project. We can integrate with architects and other professionals to ensure new build and refurbishment projects run smoothly.

# Expandable Weapon Racks

Expandable Weapon Racks are the most modular and versatile storage system available – great for large armouries or small-scale storage. Expandable Weapon Racks are available in single-sided and double-sided configurations - perfect for creating aisles of storage or bordering a room.

Expand the rack by adding additional posts, panels and components to accommodate more weapons and accessories. The entire system is made with heavy-gauge steel and powder-coated in grey Sandtex finish for added durability. All contact points with weapons have protective linings to cushion your firearms while being stored.

Over 100 weapon storage components integrate with the panels to store long guns, pistols, accessories and other equipment. The component layout can be reconfigured in seconds because of the simple system – just slide the component up, choose the new location and slide it back in.

Before Installation

After Installation

## Available sizes:

1270mm H x 865mm W

1270mm H x 1000mm W

2135mm H x 865mm W

2135mm H x 1000mm W

Increase height using 300mm and 865mm post and panel add-ons.

Available in single-sided and double-sided configurations.

Create displays, maintenance stations and more with our Weapon Wall Panels – especially where floor space is limited. Our expandable panels are engineered to easily mount to any wall with reinforced supports and wall-mount hardware. The steel panels are powder-coated with a grey or black Sandtex finish and can support most firearms.

Weapon Wall Panels can be easily reconfigured by adding more panels and choosing from over 50 components. Add as many panels as you need to suit your armoury and change the layout by moving or adding components. Slide components up and out of the panel to reposition them wherever you need.

### Available sizes:

610mm H x 865mm W

610mm H x 1000mm W

### Pre-configured models:

050-92035

050-92045

## 4. Arrange Components & Weapons

# Stackable Weapon Racks

**Stackable Weapon Racks are an ideal restricted-access storage solution.**

Perforated swing gates secure firearms with a multi-point lock mechanism and allow for easy visual inspection. The body of the rack is made with durable heavy-gauge steel and includes built-in lift handles for manoeuvring.

Inside the rack, our universal back panel lets you store any kind of weapon with over 60 component options available. Use a combination of components to store everything in your armoury, including long guns, pistols.

and even your accessories and technology. Use a cable to secure your weapons inside the rack with our built-in security eyelets.

Stackable Weapon Racks can be bolted side-to-side, back-to-back and on top of each other to create a secure storage system that suits your armoury's layout. They can also be secured to the floor and wall for additional security.

## Available sizes:

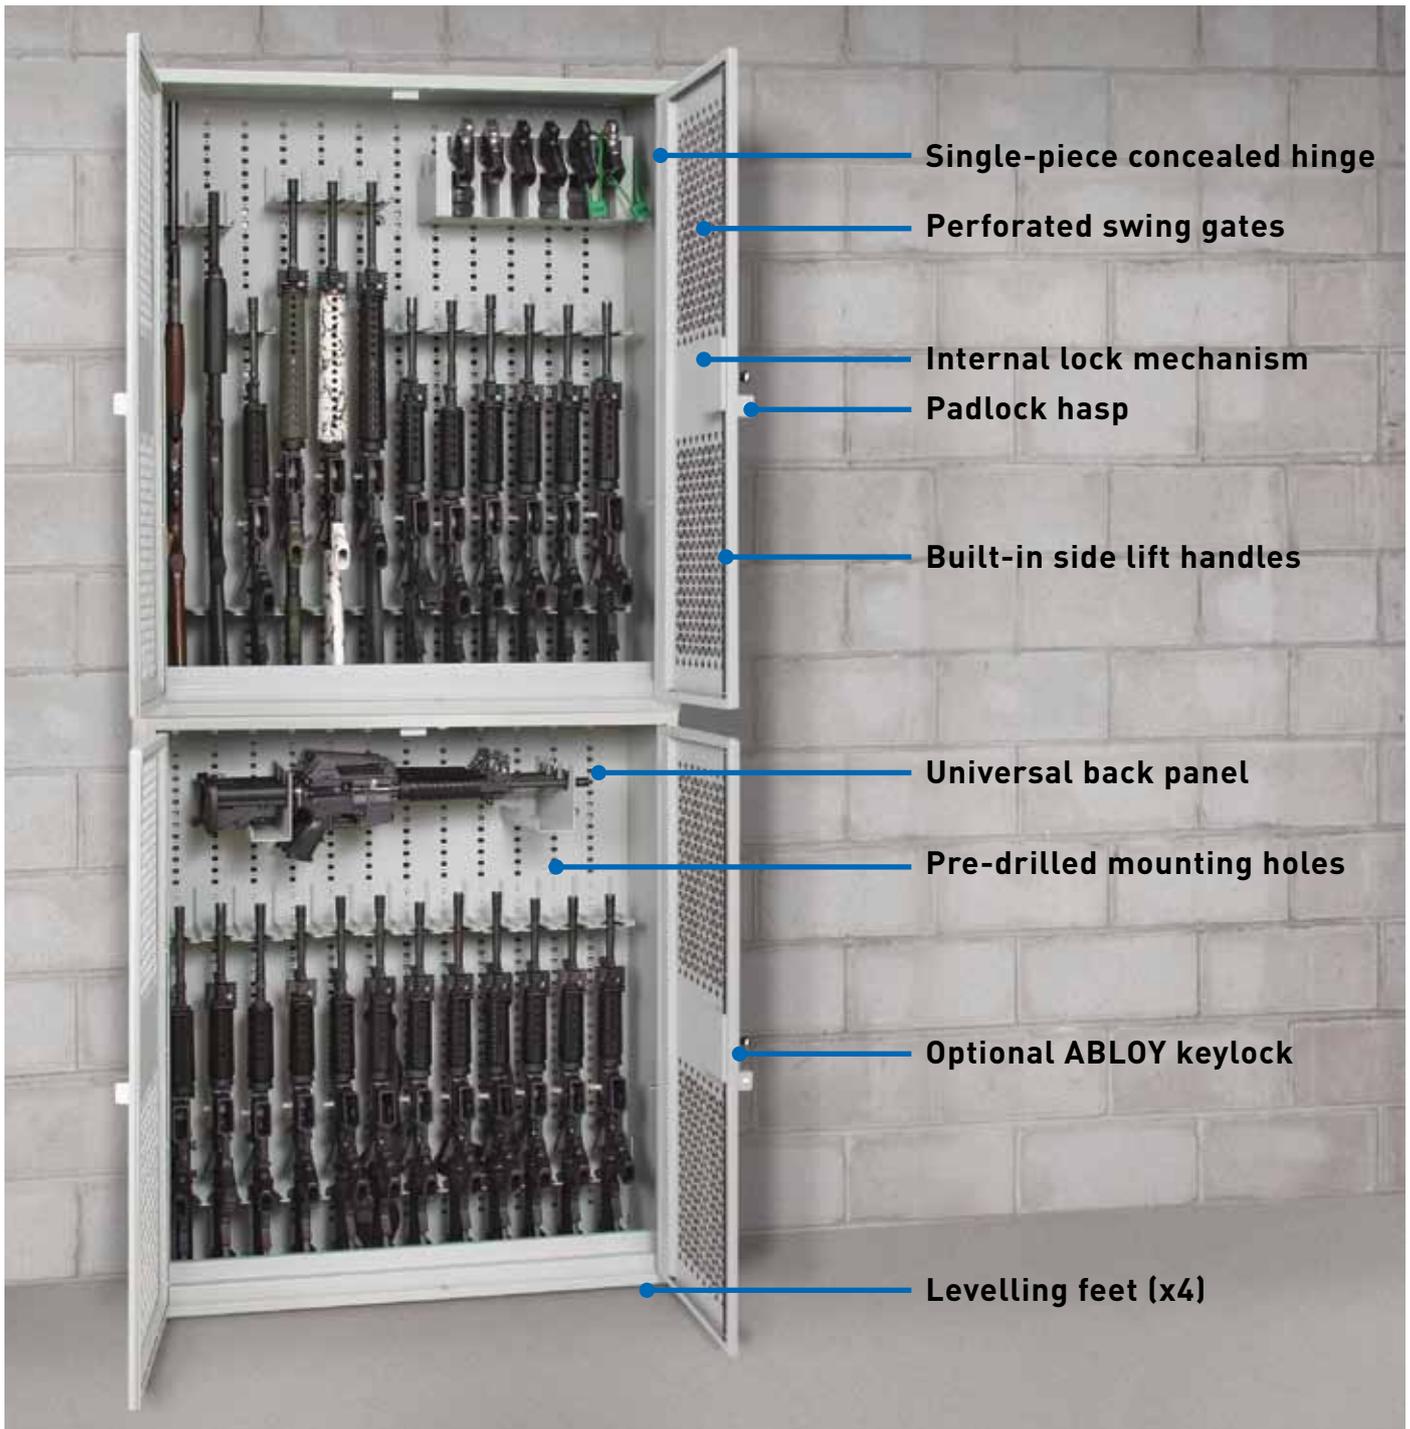

1220mm H x 355mm W x 380mm D

1220mm H x 1067mm W x 380mm D

1640mm H x 1067mm W x 380mm D

## Store:

- Long guns
- Heavy weapons
- Pistols
- Optics
- Spare barrels
- Bolt assemblies
- Helmets & personal gear
- Ammo boxes & magazines
- Accessories

Single-piece concealed hinge

Perforated swing gates

Internal lock mechanism

Padlock hasp

Built-in side lift handles

Universal back panel

Pre-drilled mounting holes

Optional ABLOY keylock

Levelling feet (x4)

# Bi-Fold Weapon Racks

Bi-Fold Weapon Racks are the best closed-access storage solution when space is a concern. Bi-folding gates save 35% in floor space compared to other gates to reduce aisle-space and mobility issues.

The all-welded steel construction provides high-level security and includes our universal back panel, built-in side lift handles and security cable eyelets. The front of the cabinet is secured by perforated

bi-folding gates so you can visually inspect weapons. Bi-Fold Weapon Racks come with a multi-point locking mechanism and swing-arm padlock hasp.

Bi-Fold Weapon Racks can be fixed side-to-side, back-to-back and on top of each other to build a solution that suits your armoury's size. For additional security, you can secure the rack to the floor and/or wall.

Store any weapon and accessory with over 75 storage components.

## Available sizes:

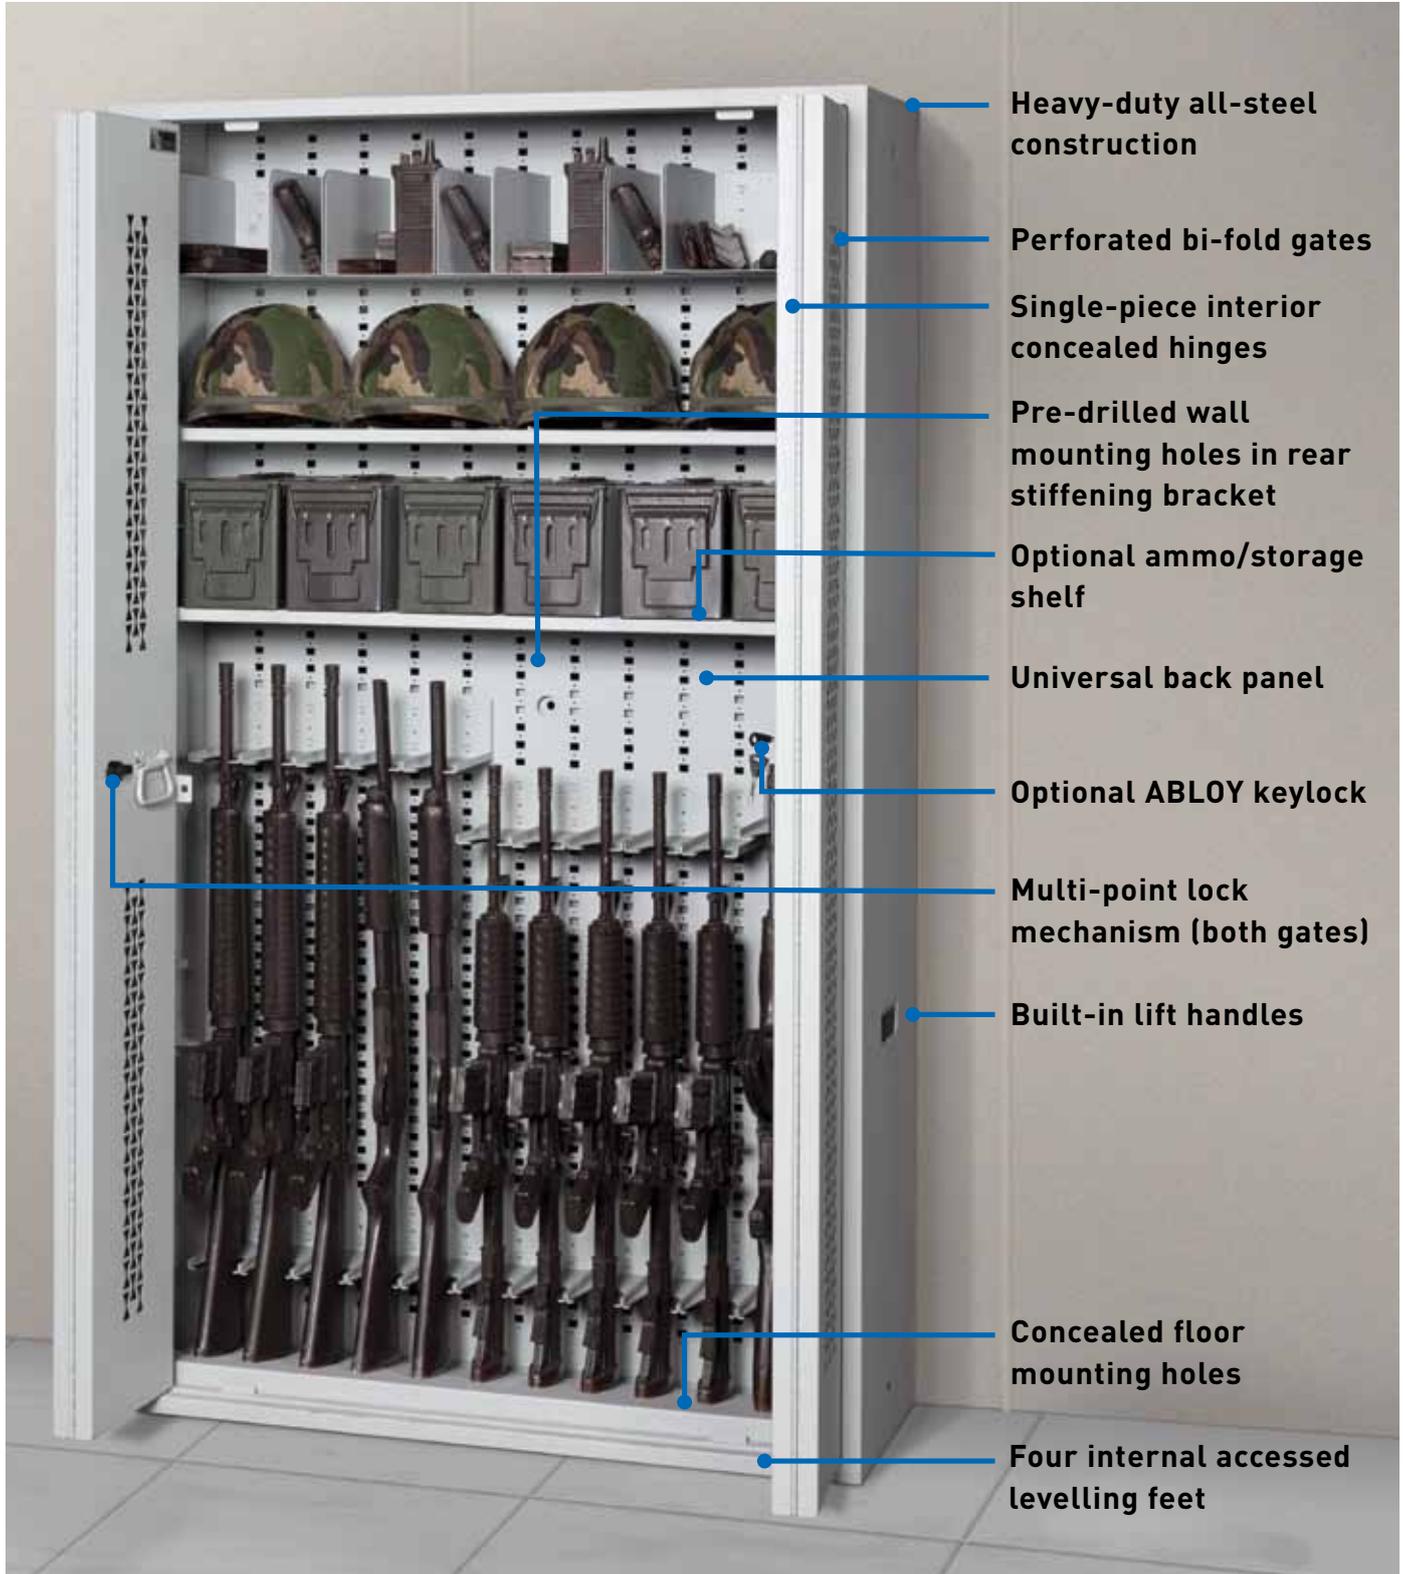

1220mm H x 1067mm W x 380mm D

1640mm H x 1067mm W x 380mm D

1830mm H x 1067mm W x 380mm D

2135mm H x 1067mm W x 380mm D

# Bi-Fold Weapon Racks

- Heavy-duty all-steel construction
- Perforated bi-fold gates
- Single-piece interior concealed hinges
- Pre-drilled wall mounting holes in rear stiffening bracket
- Optional ammo/storage shelf
- Universal back panel
- Optional ABLOY keylock
- Multi-point lock mechanism (both gates)
- Built-in lift handles
- Concealed floor mounting holes
- Four internal accessed levelling feet

# Weapon Storage Cabinets

Weapon Storage Cabinets are designed to augment a secure room and provide inconspicuous weapon storage – great for security stations, police outposts and more.

Weapon cabinets are constructed with heavy-gauge steel and are completely welded to create a secure space protected by a steel bi-parting, tambour door and multi-point lock mechanism. The cabinets come with four built-in levelling feet. Cabinets can also be anchored to the floor and wall with brackets.

Customise your Weapon Storage Cabinet with over 80 components, including an additional security gate, drawers, shelves and lockable compartments.

All components arrive factory installed in the cabinet.

## Available sizes:

1525mm H x 915mm W x 560mm D

1675mm H x 915mm W x 560mm D

1825mm H x 915mm W x 560mm D

2110mm H x 915mm W x 560mm D

*\*Security gates and universal back panels available for all four sizes.*

## Popular cabinet components include:

- Universal weapon back panel
- Internal security gate
- 3-Compartment handgun inserts
- Lockable pistol boxes
- Storage bin drawer with lockable lid

## Customise your cabinet today

# Mobile Weapon Cart

The Mobile Weapon Cart is the go-to transport solution for police and militaries around the world. Easily transport up to 20 long guns from an armoury to a training facility, vehicle or gun range – with this rugged cart, the choice is yours.

The heavy-gauge steel cart is durable, yet light enough to easily manoeuvre through hallways and doors with the welded steering handles and four heavy-duty wheels (two lock). Both sides of the cart are made using our universal panel and the cart is compatible with over 50 of our weapon storage components – so you can transport almost any weapon.

One cart can handle all of your weapon storage needs as you can quickly reconfigure the component layout by changing their location, adding new components or removing others. Simply slide the components in and out of the back panel to transport 10 long guns per side or fill the cart with pistols and accessories.

The cart is powder-coated with a black Sandtex finish for added durability.

Start moving your weapons with ease.

## Dimensions:

1258mm H x 870mm W x 680mm D

Secure storage for transporting weapons with quick access is essential to tactical teams. These easy-access, rugged pull-out drawers are adjustable to accommodate most team weapons and accessories, including rifles, carbines and shotguns.

To remove your weapons, turn the locking knob, slide the drawer out with the built-in handles and lift your weapons out to use.

We offer three versions, which allow you to stack the drawers and customize your combination. The drawer comes with mounting equipment if you want to stack the storage drawers on top of each other. Stacked storage drawers offer lots of room for weapons, plus additional tactical gear like cases, ammunition and more.

- Fix in place with 4 bolts
- Built-in 3-point latch mechanism
- Optional Secure Abloy Keylock system available

## Dimensions:

**305mm H x 1067mm W x 610mm D**

# Pistol & TASER Device Storage

## Compact Stackable Locker

This compact weapon locker is ideal for small storage requirements like pistols, nonlethal weapons and other tactical equipment like optics and cameras.

The Compact Stackable Locker is very secure. It's made with a heavy-gauge, all-welded steel construction and four individually-locking compartments. The doors are attached with a full-length concealed hinge and secured with a unique 3-digit combination lock or keyed locks. Each compartment has a rubber matting inlay to be gentle on your valuable equipment while stored.

The small locker is ideal for combining with other storage systems – like our weapon locker. The Compact Stackable Locker can be stacked on each other and attached side-to-side and back-to-back. You can also secure them to a wall.

### Dimensions:

**320mm H x 355mm W x 380mm D**

## Compact Pistol Storage Tower

This compact locker is excellent for storing pistols, TASER Devices and other equipment like optics, body cameras, batons or even evidence.

All four compartments come with a rubber matting inlay and can be uniquely keyed with an optional master key to keep your valuables safe & secure. The compartment doors offer no room for tampering tools and are attached with a full-length concealed hinge. Each compartment is 127mm H x 265mm W x 200mm D.

The Compact Pistol Tower can be used on its own or combined with other weapon storage systems. The locker comes with pre-drilled holes to mount to a wall and to fasten them side-by-side. The heavy-gauge steel is powder-coated in a grey Sandtex finish prior to assembly.

### Dimensions:

**580mm H x 305mm W x 205mm D**

# Pistol & TASER Device Storage

## TASER Device Storage Cabinet

Securely store up to 20 TASER Devices in a single TASER Device Storage Cabinet.

TASER Device cabinets can be fully-loaded with five secure, 2-compartment drawers or left wide open depending on your storage requirement. All drawers slide on easy-glide full-suspension drawer hardware. The secure drawers can hold up to two TASER Devices each and can be uniquely keyed – which is great for team environments

TASER Device Storage Cabinets can be stacked on top of each other and attached side-to-side and back-to-back if you need more storage space for TASER Devices, or gear and accessories. Pre-drilled holes

make attaching the cabinets quick and simple. Add a riser to increase the cabinet height by 250mm.

The cabinets come fully assembled with all of your chosen components. The TASER Device Storage Cabinet is powder-coated in a grey Sandtex finish..

### Dimensions:

660mm H x 635mm W x 560mm D

## Pistol Storage Cabinet

The 5-drawer pistol cabinet is made for storing everything handgun related and is perfect for every armoury.

The heavy-duty steel cabinet has 5 spacious drawers secured by a single lock mechanism. Each drawer can be customised to suit your specific storage needs and includes a rubber matting inlay to protect your equipment. The cabinet and drawers are powder-coated in a grey Sandtex finish for extra durability.

Outfit your drawers with specially designed components, including front-to-back and left-to-right compartment dividers or our 30-gun insert. Our handgun insert fits perfectly in the drawer and stores 30 handguns and 2 magazines for each gun, meaning the cabinet has a 150-gun capacity.

Add protective rubber matting to the top to create an excellent cleaning or round-loading station.

### Dimensions:

1145mm H x 1055mm W x 635mm D

## Constable Locker

The Constable Locker is designed for storing gear and weapons in one secure locker. Perfect for team applications, everyone can keep their gear, weapons and accessories organised in their own space.

Both compartments are vented to keep gear well ventilated. The bottom roll-out drawer is perfect for boots and other heavy objects. The top compartment comes with a heavy-duty shelf, hooks, hanger bar and universal back panel – perfect for storing jackets, vests, accessories and weapons.

The bench design makes this an excellent storage solution for changing rooms, training areas and more. A wooden butcher's block bench is available for an extra charge.

### Dimensions:

**1830mm H x 610mm W x 610/815mm D**

**1830mm H x 460mm W x 610/815mm D**

Bench colour/material options

## Duty Bag Locker

Store heavy gear bags, accessories and other equipment in the strong and secure Duty Bag Locker.

The locker has four individual compartments that can be secured with a padlock or keylock. The top three compartments are secured by a steel door, full-length concealed hinge and your choice of lock. The bottom compartment is a slide-out drawer that's equipped with easy-glide suspension arms for quick access. All four compartments offer lots of storage space and can handle most storage requirements.

Duty Bag Lockers can be combined with other products to create full-service storage systems. Attach the duty bag locker to a constable locker or cabinet for extra storage. The lockers arrive fully assembled and are powder-coated in a grey Sandtex finish.

### Dimensions:

**1980mm H x 460mm W x 610mm D**

## TA-50 Locker

This locker is designed for lots of gear storage. The TA-50 Locker comes with a pre-installed heavy-duty wardrobe shelf with 3 hooks and a hanger bar. It also includes two columns of notches in the back panel to accept weapon storage accessories – the rest is wide open. It is perfect for large gear bags or any other storage requirement.

Split storage version is also available.

The all-welded steel locker has perforated sides and gates for easy visual inspection and ample air ventilation. The gates are secured with a multi-point locking mechanism, including a padlock hasp.

There's no assembly required and no bolts to tighten over time. The fully-assembled TA-50 Locker will arrive with a powder-coated black Sandtex finish.

### Dimensions:

1980mm H x 1068mm W x 610mm

## Mortar Storage

We design and build weapon storage components that are compatible with heavy-weapon storage. Our special components are made to work in a variety of systems including open racks, secure racks and cabinets – we also have solutions for shipboard and airborne vehicles.

Check out our storage systems for mortars, launchers and 12.7mm / .50 calibre weapons.

## .50 Cal M2 Storage

## Carl Gustav Storage

Imagine what happens when the highest density weapon storage system is mounted onto mobile carriages. All the space previously allocated to aisles and walkways is converted to storage – so the quantity of weapons which can be stored in any given area is nearly doubled.

All our standard products can be fitted to our roller racking system to provide previously unattainably high levels of storage density for all types of firearms.

The weapon racks are mounted on carriages and are simply rolled along to move the aisle into the required location. The carriages glide on low friction rails and are moved effortlessly using a handle mounted to each carriage. In-built safety systems eliminate any risk of injury to personnel using the system. In addition our anti-tilt mechanism ensures that weapons are secure on the rack at all times.

Armouries are by their nature expensive facilities, so getting more from existing locations enables great cost savings and avoids disruption to daily operations.

The cost of relocating or rebuilding an existing armoury can be completely avoided by using our mobile racking system.

The system can be installed on any hard floor surface without causing any damage:

- Use with any floor type
- No damage to floor or coating
- Extend or reduce size of the mobile racking as required
- Lift and relocate the entire system to new location
- In built safety features
